

Within WP 3 Recruitment of researcher, Prof. Andrea Katovic finished her recruitment at TTF

Thursday, 31 March 2011

Prof. Andrea Katovi from the University of Calabria, Faculty of Engineering, Department of Chemical and Materials Engineering has finished her recruitment at the Department of Textile Chemistry & Ecology, Faculty of Textile Technology, University of Zagreb. She was recruited as an experienced researcher on the T-Pot project in two shifts:

-

• First one: from October 2009 till April 2010 and

-

• Second one: from October 2010 till April 2011.

During her recruitment at TTF Prof. Katovi was mostly engaged in establishment of two new laboratories: SEM and Textile science research laboratory. Furthermore, she was engaged in cooperation with the researchers from the academic or industrial sector based on the measurements and interpretation of the results, mostly on the new equipment purchased by T-Pot project:

-

• Scanning electron microscopy (SEM)

-

• Infrared Spectroscopy (FT-IR)

-

• Thermal analysis (DSC and TGA)

-

• UV-VIS Spectroscopy.
